

COVID-19 Is NOT a pandemic.

"Just the facts" Did you know?

COVID is a mild form of the flu: *"80% of people will experience mild to no symptoms."*

82% of COVID deaths are in seniors homes and 97% were 60+ years of age, with at least one serious underlying health condition. Lethality rate for people under 65 is .0006%; less than the flu! CDC's new figures: lethality rate is only .26%!

Provinces record all *"probable"* or *"presumed"* cases, as being COVID, even if no test was performed. Deaths with the virus are marked as deaths because of the virus. Global experts, such as Dr. John Ioannidis from Stanford University, estimates **25-80x** more cases than currently reported; lowering the death rate dramatically. The death rate statistics are significantly inaccurate and are virtually the same as seasonal influenza.

Former Manitoba Public Health Officer Dr. Joel Kettner has spoken out against the measures taken by governments worldwide. He has also criticized how rates and numbers have been calculated and presented as *"misleading without context"*. He has emphasized that 95% of deaths have occurred in people over 60, most of which had chronic health conditions, 80% of deaths have been in nursing homes and with no deaths in children or youth. *"Based on these numbers, and research estimates of undiagnosed cases, the chances of dying for those younger than 60 is less than 1 in 2500 - even lower in the absence of risk factors."*

P.M. Trudeau has imposed a police state and draconian restrictions of our Constitutional rights and liberties without approval of Parliament. They have suspended many of our rights, liberties and privacies, on an indefinite basis, pending a vaccine. It takes about 7.8 years for a vaccine to come to market.

Scientists have **never** successfully manufactured a coronavirus vaccine. There are still no vaccines for SARS and MERS.

Mega doses of Vitamin C are known to kill all viruses, and 6,200 doctors have confirmed that hydroxychloroquine is the most effective therapy, with a 92% success rate! By refusing to prescribe these as treatment, MDs are breaking their Hippocratic oath, to *"do no harm"*.

No study has confirmed masks work to stop the flu or any other virus.

Masks can reduce oxygen levels by up to 60%, cause increased facial touching, which spreads germs and viruses, increases CO2 intake, and other contaminants within the mask.

If you have a viral infection, masks will result in breathing back in some of these viruses, concentrating them in your nasal cavity and causing longer infection time.

Gov'ts are promoting phone tracking apps, vaccine passports, recording names and contact info of restaurant patrons (contact tracing), and using loyalty cards to unknowingly track us, violating our Constitutionally protected privacy rights by doing so.

The Canadian and Provincial governments re-engineered our society, destroyed our social trust, created unjustified fear and paranoia, borrowed \$300+ billion at interest (breaking our record of national debt), increased the unemployment rate to over 15%, crippled our oil and gas industries, ruined our tourism industry, closed our schools and borders, delayed and cancelled critical surgeries (causing preventable deaths), and shut down places of worship. All for a virus with a 99% survival rate!

Solutions Focus all restrictions to those most at risk: elderly, senior's homes, and those with multiple health conditions, not the public!

Vitamin C or hydroxychloroquine must be considered as life-saving treatments, based on the research, and given to patients with confirmed cases of COVID-19.

Fully restart the economy NOW in every province. No contact-tracing or unlawful medical privacy violations. Promote personal responsibility for health.

*Quarantine restricts movement of sick people.
Tyranny restricts movement of healthy people.*

If you don't realize the gov't is using a virus with a 99% survival rate to control the country, you're not paying attention. Something much bigger is happening.
